EDUCATION

ST. JOSEPH'S COLLEGE OF ENGINEERING & TECHNOLOGY

B.Tech — AI & Data Science
GPA: 8.60 / 10.0

SKILLS

AI & ML

Python, Prompt Engineering, LLM APIs (IBM Granite, Gemini AI), RAG basics, Generative AI

Frontend

HTML5, CSS3, JavaScript, Bootstrap, ReactJS (basics)

Backend & DB

Node.js, Firebase (Realtime DB, Firestore, Auth, Hosting),

Tools & Platforms

Streamlit, IBM Cloud, Shopify, Git, GitHub

ACHIEVEMENTS

NPTEL — Human Computer Interaction

Scored 85% in the paper — top 15% nationally.

IBM SkillsBuild — RAG Lab

Completed hands-on RAG lab covering vector DBs, embedding pipelines & retrieval-augmented generation.

Hackathons

Attended 3–4 hackathons, building rapid prototypes under time-constrained, team-based environments.

SPARKFEST '26

Organized intra-college symposium — coordinated 200+ participants across 6 events.

VistsQuest 2K26

Secured 2nd Prize in Data Cleaning Event, competing against 50+ teams.

COURSEWORK

Core

Data Structures, DBMS, OOP, Cloud Computing, Machine Learning

INTERNSHIP EXPERIENCE

IBM & EDUNET FOUNDATION | AI & CLOUD INTERN

Jun 2025 – Jul 2025 | Online

- Built **"Fitness Buddy" & "AI Travel Planner" chatbots** using IBM Granite LLMs, Python, and Streamlit, handling real-time user queries via LLM API pipelines.
- Integrated LLM API pipelines on IBM Cloud to process structured prompts, reducing response latency by **~40%** vs naïve chaining.
- Tech stack: **Python, IBM Granite, Streamlit, IBM Cloud.**

META 3 INFOTECH | SHOPIFY DEVELOPER INTERN

Nov 2025 – Feb 2026 | Online

- Designed and deployed a production Shopify store — structured **5+ product catalogs** and customized Liquid-based theme UI/UX, cutting manual content entry by **30%**.
- Leveraged **Gemini AI** to auto-generate product media assets, reducing media creation time by **50%**.
- Validated end-to-end order workflows (payment, checkout, security), achieving **zero post-launch critical bugs**.

UNIFIED MENTOR PVT. LTD. | WEB DEVELOPER INTERN

Dec 2025 – Mar 2026 | Online

- Built and deployed **2 full-stack web apps** end-to-end (requirements → design → testing → deployment) using Firebase and JavaScript.
- Implemented Firebase Auth, Realtime DB, Firestore, and Hosting from scratch, enabling secure multi-user access with **< 2s** load time.

PROJECTS

SUPER MALL WEB APPLICATION

- Built a role-based (Admin/User) full-stack mall directory using **HTML, CSS, JS, Node.js & Firebase**, managing 50+ product listings with real-time Firestore sync and Firebase Auth.
- Implemented favourites/wishlist feature enabling users to plan purchases before visiting, improving store engagement.

TOURCHATBOT – AI TRAVEL PLANNER

- Built an AI chatbot in **Python + LLM API** that generates day-wise itineraries with cost estimates, deployed on Streamlit with **< 3s** response time.
- Used prompt chaining to decompose multi-city queries into structured JSON itineraries, improving plan accuracy vs single-shot prompting.

SPORTS BUDDY

- Developed a role-based (Admin/User) sports portal using **HTML, CSS, JS, Node.js & Firebase** to manage sports details and showcases achievers with secure auth and real-time DB.
- Deployed on Firebase Hosting — Admin panel enables live CRUD on sports records without page reload.

RESPONSIVE FASHION STORE WEBSITE

- Designed a fully responsive e-commerce UI using **HTML5, CSS3 & JavaScript** with product filtering, a dynamic cart, and mobile-first layouts across all screen sizes.
- Implemented CSS Grid/Flexbox layouts and vanilla JS cart logic, achieving consistent rendering across Chrome, Firefox and Safari.

ONLINE SWEETS ORDERING PLATFORM

- Built a complete sweets ordering website (product catalogue, cart, order management) using **HTML, CSS & JavaScript** — fully functional except the payment gateway.
- Structured modular JS components for the cart and order flow, making the codebase extensible for future payment integration (Razorpay/Stripe).
